

## Need an inexpensive quality methodology for your IT projects?

QualityNow is a .Net product that has been specifically designed for small to medium software development firms looking to enhance their software development processes by applying quality processes to the delivering of ICT projects.

Based on the Capability Maturity Model Integration (CMMI) quality methodology, it provides a mechanism for version control, testing, release procedures to track and document the phases of software projects from initial specification, to signoff documentation and implementation.

### Quality Now – benefits it provides

- Simple to use and effective tool designed for software developers
- Most cost-effective way to assure quality outcomes to all projects
- Innovative, external support and resources to implement effective business processes
- Enables traceability through your product and for each one of your clients

Challenger Momentum are an IT services firm who provide a comprehensive range of innovative and cost effective services, including outsourced IT support (facilities management), application development and customised software, strategic IT consulting and technical support across Australia.

Our services are quality assured and highly cost effective. Clients such as Legal Practitioner Liability Committee, VicRoads, Department of Primary Industry and many others have engaged us over the last 10 years.

### Key features

The system provides a range of features including the ability to:

- Store your project specification, change request and project estimations
- Generate the list of features that need to be tested. Create test plans, record multiple test cycles and records, and enter bugs against features, methods of fix and the versions in which the errors were corrected
- Produce sign off acceptances sheets - crucial to be able to submit your invoices and have them paid
- Generate documentation for software implementation for your clients

## 您的IT项目需要一个更低成本的质量监控方法学吗?

Quality Now 是一个基于Microsoft .Net的产品,专门为那些希望通过质量监控来加强软件开发过程的中小型软件开发公司而设计,用以提高所承担的ICT项目的递交质量。

基于“综合能力评估模型(CMMI)”的质量评估方法,它为版本管理、测试、发布过程提供了从初期软件要求,到签署文件和软件开发提供了一个有章可循的机制。

### Quality Now – 能够为您带来的受益:

- 为软件研发人员而设计的简单易用的工具
- 投资最少、见效最快的方法来保证所有项目产品的质量
- 创新的项目外支持和资源,以实现高效的商业运作
- 增强的产品及客户信息记录和查询功能

Challenger Momentum是专业的IT服务公司,在全澳洲范围内提供广泛的创新高效的IT服务,包括外包式IT支持(设施管理)、应用软件开发和定制、战略性IT咨询和IT技术支持。

我们的服务质量高且投资少见效快。

我们的客户,如Legal Practitioner Liability Committee, VicRoads, Department of Primary Industry 近10年来一直与我们保持着稳定友好的合作关系。

### 主要特色:

本系统提供了以下主要特色和功能:

- 存储您的项目规格明细,项目更改记录 和 项目预算
- 生成产品性能测试项的列表。为您创建测试计划,记录测试的周期和结果,记录影响产品性能的BUG、修正方法和修正后的版本记录
- 生成项目批准用客户评估表单 —对于递交报价清单以及客户支付是至关重要的
- 为您的客户生成软件使用帮助
